DBM-COT ITEM Catalog (ITEM #1 – ITEM #172)

This document provides a consolidated catalog of DBM-COT ITEMS for DOI reference and archival purposes.

ITEM #1 – ITEM #20: Foundations & Differential Tree Origins
1. ITEM #1 — Motivation & Foundations of DBM
2. ITEM #2 — Differential Tree as Structural Substrate
3. ITEM #3 — Two-Phases Search Principle
4. ITEM #4 — Metric Space Computational Structure
5. ITEM #5 — LHS-RHS Structural Matching
6. ITEM #6 — Structured Knowledge in DBM
7. ITEM #7 — Introduction to Event Language Model (ELM)
8. ITEM #8 — Evolution Space of DBM
9. ITEM #9 — Unified Properties of Differential Trees
10. ITEM #10 — Perspective as Cognitive Coordinate
11. ITEM #11 — Origins and Inspirations of DBM
12. ITEM #12 — Structural Similarity and Distance
13. ITEM #13 — Variable-Size Block Indexing
14. ITEM #14 — Structural Search Optimization
15. ITEM #15 — Differential Tree Construction Algorithms
16. ITEM #16 — Structural Granularity Control
17. ITEM #17 — Block Merge and Split Rules
18. ITEM #18 — Structural Consistency Constraints
19. ITEM #19 — Early DBM Prototypes
20. ITEM #20 — Summary of Foundational Principles

ITEM #21 – ITEM #40: Structural Universe & Search Engines
21. ITEM #21 — Structural Space Partitioning
22. ITEM #22 — Hierarchical Metric Indexes
23. ITEM #23 — Euclidean Differential Trees
24. ITEM #24 — Metric Differential Trees
25. ITEM #25 — Search Cost vs Accuracy Tradeoff
26. ITEM #26 — Anchor-Based Search
27. ITEM #27 — Perspective-Guided Traversal
28. ITEM #28 — Structural Pruning Strategies
29. ITEM #29 — Multi-Resolution Search
30. ITEM #30 — Structural Search Benchmarks
31. ITEM #31 — Stability of Search Structures
32. ITEM #32 — Incremental Index Update
33. ITEM #33 — Dynamic Data Adaptation
34. ITEM #34 — Structural Search APIs
35. ITEM #35 — Search Engine Engineering Skeleton
36. ITEM #36 — Failure Modes in Structural Search
37. ITEM #37 — Debugging Structural Indexes
38. ITEM #38 — Visualization of Search Trees
39. ITEM #39 — Comparative Search Paradigms
40. ITEM #40 — Structural Search Summary

ITEM #41 – ITEM #60: Rules, Engines, and Structural Reasoning
41. ITEM #41 — Rule-Based Structural Engines
42. ITEM #42 — Differential Rule Application
43. ITEM #43 — Constraint Propagation in Trees
44. ITEM #44 — Decision Boundaries in Metric Space
45. ITEM #45 — Structural Voting Mechanisms
46. ITEM #46 — Ethics and Power in Structural AI

47. ITEM #47 — Trust and Rule Evolution
48. ITEM #48 — Metric Space as New Computational Frontier
49. ITEM #49 — Gravity-Based Clustering Alternatives
50. ITEM #50 — Rule Evaluation Pipelines
51. ITEM #51 — Human Reasoning and Rule Dependence
52. ITEM #52 — Differential Tree Rule Engines
53. ITEM #53 — Relative Ordering via Structural Graphs
54. ITEM #54 — Cross-Tree Causal Rules
55. ITEM #55 — Comparative Rule Engine Survey
56. ITEM #56 — Traditional Knowledge as Structural Rules
57. ITEM #57 — Target-Grid Adversarial Models
58. ITEM #58 — DBPS Unified Simulation Framework
59. ITEM #59 — Structural Rule Debugging
60. ITEM #60 — Flood Peak and Decision Saturation

ITEM #61 – ITEM #80: Cross-Space Matching & Perspective
61. ITEM #61 — Cross-Metric Space Matching
62. ITEM #62 — Core Cross-Space Matching Algorithms
63. ITEM #63 — Perspective Distance Computation
64. ITEM #64 — Multi-Space Alignment
65. ITEM #65 — Lossless Matching Requirements
66. ITEM #66 — Structural Projection Techniques
67. ITEM #67 — Common Concept Core (CCC)
68. ITEM #68 — Perspective Anchors
69. ITEM #69 — Multi-View Structural Fusion
70. ITEM #70 — Matching Evaluation Metrics
71. ITEM #71 — Structural Consistency Across Spaces
72. ITEM #72 — Ambiguity Resolution
73. ITEM #73 — Conflict Handling in Matching
74. ITEM #74 — Incremental Alignment Updates
75. ITEM #75 — Engineering Cross-Space APIs
76. ITEM #76 — Performance Optimization
77. ITEM #77 — Visualization of Cross-Space Matches
78. ITEM #78 — Comparative Matching Frameworks
79. ITEM #79 — Failure Analysis
80. ITEM #80 — Cross-Space Matching Summary

ITEM #81 – ITEM #100: Event, Language, and Lossless Encoding
81. ITEM #81 — Event-Centric Intelligence
82. ITEM #82 — Event Decomposition
83. ITEM #83 — Temporal Structures in Events
84. ITEM #84 — ELM Grammar
85. ITEM #85 — Lossless Event Encoding
86. ITEM #86 — Multi-Tier Event Trees
87. ITEM #87 — Event Similarity Measures
88. ITEM #88 — Event Search Engines
89. ITEM #89 — Event Evolution
90. ITEM #90 — Event Debugging
91. ITEM #91 — Language as Structural Events
92. ITEM #92 — Sentence-Level Events
93. ITEM #93 — Macro Event Composition
94. ITEM #94 — Event Boundaries
95. ITEM #95 — Event Persistence
96. ITEM #96 — Event Versioning
97. ITEM #97 — Visualization of Event Space
98. ITEM #98 — Event Evaluation Metrics
99. ITEM #99 — Comparative Event Models

100. ITEM #100 — Event System Summary

ITEM #101 – ITEM #120: ACLM, CCGL, and Program Intelligence
101. ITEM #101 — Autonomous Coding Language Model (ACLM)
102. ITEM #102 — Program Structure as Graphs
103. ITEM #103 — Calling Graph Language (CCGL)
104. ITEM #104 — Structural Program Representation
105. ITEM #105 — Vertical Mutations
106. ITEM #106 — Horizontal Mutations
107. ITEM #107 — Self-Repair Loops
108. ITEM #108 — Program Evolution
109. ITEM #109 — Semantic Tagging
110. ITEM #110 — Structural Program Search
111. ITEM #111 — Dual CCGL Alignment
112. ITEM #112 — Task vs Action Semantics
113. ITEM #113 — Program CCCs
114. ITEM #114 — Procedure–Concept Duality
115. ITEM #115 — Mutation Governance
116. ITEM #116 — Program Evaluation
117. ITEM #117 — Toolchain Integration
118. ITEM #118 — Debugging Program Evolution
119. ITEM #119 — Comparative Auto-Programming
120. ITEM #120 — ACLM/CCGL Summary

ITEM #121 – ITEM #140: Structural Intelligence & Paradigms
121. ITEM #121 — Structural Intelligence Overview
122. ITEM #122 — Symbolic AI Revisited
123. ITEM #123 — Connectionist AI Revisited
124. ITEM #124 — Hybrid Intelligence
125. ITEM #125 — Mutation as Core Mechanism
126. ITEM #126 — CCGL and the Next Programming Era
127. ITEM #127 — Human–AI Collaboration
128. ITEM #128 — Structural Creativity
129. ITEM #129 — From Scaling to Research
130. ITEM #130 — Research Efficiency
131. ITEM #131 — CCGL DNA Signatures
132. ITEM #132 — Stock AI vs Incremental AI
133. ITEM #133 — Structural Generalization
134. ITEM #134 — Interpretability
135. ITEM #135 — Evaluation Frameworks
136. ITEM #136 — DBM DOI Usage & Evidence Manual
137. ITEM #137 — Knowledge Governance
138. ITEM #138 — Open-Source Strategy
139. ITEM #139 — Reproducibility
140. ITEM #140 — Horizontal Mutation Completion

ITEM #141 – ITEM #160: Evolution, Governance, and Engineering Rules
141. ITEM #141 — Missing-Strands Reconstruction
142. ITEM #142 — Self-Repair Loop (SRL)
143. ITEM #143 — Structural Stability
144. ITEM #144 — Semantic-Aware Programming
145. ITEM #145 — Semantic Commenting Standards
146. ITEM #146 — Visual Differential Trees
147. ITEM #147 — Dual-CCGL Semantic Alignment
148. ITEM #148 — CCC-Class & CCC-Package
149. ITEM #149 — Concept–Procedural Duality
150. ITEM #150 — Dream Geometry
151. ITEM #151 — Fork Normalization

152. ITEM #152 — Structural Intelligence Manifesto
153. ITEM #153 — DBM-COT Executive Overview
154. ITEM #154 — Construct–Deconstruct Intelligence
155. ITEM #155 — AlphaFold vs DBM
156. ITEM #156 — Two-Phases Structural Intelligence
157. ITEM #157 — ELM Lossless Encoding
158. ITEM #158 — Multi-Tier Metric Trees
159. ITEM #159 — Structural Intelligence Definition
160. ITEM #160 — Structural Intelligence vs Symbolic / Connectionist AI

ITEM #161 – ITEM #172: Strategy, Roadmap, and Evolution Law
161. ITEM #161 — Structural Intelligence Applications
162. ITEM #162 — Why LLM Cannot Reach Structural Intelligence
163. ITEM #163 — APTGOE Engine
164. ITEM #164 — Engineering Rules
165. ITEM #165 — Structure Evolution Failure
166. ITEM #166 — Lossless Membership Ladder
167. ITEM #167 — Advanced ACLM Topics
168. ITEM #168 — CCC Evolution Evaluator
169. ITEM #169 — Extended Structural Intelligence
170. ITEM #170 — A Brief History of Intelligence (DBM Perspective)
171. ITEM #171 — From COT to COSt to COSo
172. ITEM #172 — From Primary Peaks to Revisiting Secondary Problems
